"This book addresses every aspect of ISO 9000 Quality Systems Auditing. Any organization preparing for ISO certification will need to carry out Internal Audits to confirm that its Quality System has been implemented and is effective in achieving the organization's objectives. Such auditing also provides opportunities for everyone to make changes to the Quality System so that it can become more efficient." "Dr Green addresses 'evaluation' of suppliers through second party audits, but he also shows how these can be kept to an absolute minimum by the introduction of a systematic method for getting on to an Approved List." "The mystique surrounding third party audits is removed by detailed explanations of pre-audits, pre-assessments and assessments. The attributes of good auditors and important facets of good auditing are discussed. Inexperienced and experienced auditors could also benefit from studying the set of 'core questions' prepared for their use."--BOOK JACKET. Implementing the requirements of ISO 9001 can be a daunting task for many organizations. In an attempt to develop a system that will pass the registration audit, we are tempted to establish processes with the primary purpose of conforming to the requirements of ISO 9001. In doing so, however, it is easy to lose sight of the primary intent of the standard: to continually improve the effectiveness of the quality management system (QMS) implemented at our organization. This book is intended to help managers, quality professionals, internal audit coordinators, and internal auditors implement a practical internal audit process that meets the requirements of ISO 9001:2015 while adding significant, measurable value to the organization. The tools, techniques, and step-by-step guidelines provided in this book can also be used by those organizations that have a well-established internal audit process but are looking for easy ways to make that process more effective. The tools in the appendices of this book have also been provided on the enclosed CD to facilitate your customizing them to fit the specific needs of your organization.
